Q: What is an E-wallet?

A: An E-wallet is an electronic wallet that can be used for different things i.e. follow a digital coin development (currency exchange rates), transfer, purchase and sell digital coins (like for example Viridi

Coin and LTC). Depending on the digital currency some individuals and companies accept the currency as a payment method.

Q: Is it easy to set up and use an E-wallet?

A: It exists many different E-wallets, but they all work in similar ways. When you have chosen the one or the ones you want to use it is simple to register your personal information, validate your identity, set up payment methods etc. and after that get started. It can be done via a smart phone a tablet or on a computer.

Q: Why do I have to verify my identity when setting up an E-wallet?

A: Since an E-wallet is a type of a digital bank account, which you will use to receive, buy, sell and withdraw funds from, it is important that the holder of the E-wallet can confirm that 'you are you'. An E-wallet should, just as a normal wallet, a credit card, a bank account, be treated as a value document to prevent transactions are made by non-authorized persons. To ensure security of your funds, several security measures are taken to protect your funds and the identify validation is one of them.
